

TCS3200

TCS3200 Color Sensor Color Recognition Module Color Sensing

Features:

- Built in TCS3200/TCS3200D Color sensor chip
- Brand new and high quality
- Input Voltage: 3V ~ 5V
- Best Detection Range: 10mm
- High-resolution conversion of light intensity to frequency
- Chip pins all has drawn for standard 100mil, the needle(254 mm)
- Mil-convenient for bitmap board
- Programmable color and full-scale output frequency
- Communicate directly with a microcontroller
- PCB Size: 29 * 21 mm

Contains:

1 x TSC3200 Color Sensor Module
