XH-M452 Thermostat Temperature Humidity Thermometer Hygrometer Module DC

Description:

- DC 12V XH-M452 Temperature And Humidity Controller Module Digital Display High Accuracy Dual Output Automatic Constant Temperature And Humidity Control Board

- Set the temperature + : Normal display mode, long press the + key for 3 seconds, start temperature numerical flashing, press the + / - key to set values.

- If you do wrong operation ,it will return to detect temperature display automatically after 5 seconds .

- Set the temperature - : Normal display mode, long press - button for 3 seconds, stop numerical flashing temperature, press the + / - key to set value.

- Restore the factory Settings: At the same time long press temperature, and humidity + key for 3 seconds, digital display, 888, 888.

Specification:

- Material: Plastic

- Product detailed size: module size 55x65mm/2.17x2.56inch, sensor size 26x55mm/1.02x2.17inch

- Model: XH-M452

- Voltage: DC 12V

- Temperature range: -20°C to 60°C

- Temperature range: 0% to 100%RH

- Control accuracy: 0.1°C, 0.1RH

- Detector probe: integrated sensor

- Output type:Relay output

- Output capacity: up to 10A
